GROWING FOOD AT HOME

Many people grow food at home.

They grow food in gardens.
People start growing food in spring.

People put seeds into dirt.

The seeds become plants.
Food grows on the plants.

The food may be

- green beans,
- carrots,
- watermelons
- or strawberries.
People wait for the food to be ready.

People pick the food.

Then they eat the food.
VEGETABLE AND FRUIT SALAD

NEED

- 16-oz bag coleslaw mix
- 2 apples, cored and chopped
- 1 C diced green pepper
- 2 green onions, sliced
- 1 C dried cranberries
- ¾ C coleslaw dressing
- large bowl
- large spoon

NOTE: Always consider student food allergies when preparing recipes.

May 11, 2020
1. Put coleslaw mix, apples and green pepper into bowl. Stir.

2. Put green onions and dried cranberries into bowl. Stir.

4. Eat.
Knock, Knock.

Who’s there?

Home.

Home who?

Home - any plants will you grow?

How many - any?
I have a joke!

Tell me!

What vegetable do chickens like?

I don't know. What?

Egg - plant!
